IT114-006-S2024 - [IT114] Number Guesser 4

Submissions:

Submission Selection

1 Submission [active] 2/13/2024 6:10:17 PM

Instructions

COLLAPSE

- Create the below branch name
- Implement the NumberGuess4 example from the lesson/slides
    - https://gist.github.com/MattToegel/aced06400c812f13ad030db9518b399f
- Add/commit the files as-is from the lesson material (this is the base template). You may want to push this commit so you can open the pull request and keep it open.
- Pick two (2) of the following options to implement
    - Display higher or lower as a hint after a wrong guess (only after a wrong guess that doesn't roll back the level)
    - Implement anti-data tampering of the save file data (reject user direct edits)
    - Add a difficulty selector that adjusts the max strikes per level (i.e., "easy" 10 strikes, "medium" 5 strikes, "hard" 3 strikes)
    - Display a cold, warm, hot indicator based on how close to the correct value the guess is (example, 10 numbers away is cold, 5 numbers away is warm, 2 numbers away is hot; adjust these per your preference) Only display this when the wrong guess doesn't roll back the level
    - Add a hint command that can be used once per level and only after 2 strikes have been used that reduces the range around the correct number (i.e., number is 5 and range is initially 1-15, new range could be 3-8 as a hint)
    - Implement separate save files based on a "What's your name?" prompt at the start of the game (each person gets their own save file based on user's name)
- Fill in the below deliverables
- Save changes and export PDF
- Git add/commit/push your changes to the HW branch
- Create a pull request to main
- Complete the pull request (don't forget to locally checkout main and pull changes to prep for future work)
- Upload the same PDF to Canvas

Branch name: M3-NumberGuesser-4

Tasks: 7 Points: 10.00

Implementation 1 (4 pts.)

COLLAPSE

COLLAPSE

Task #1 - Points: 1

Text: Chosen Option and Details

Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Mention which option you picked
#2	1	Explain the logic of how you solved/implemented the chosen option (concrete details). Explain how the code works, don't just paste code snippets

Response:

The option that I picked is option 1 (Display higher or lower as a hint after a wrong guess). I looked for 'processGuess' and I added systemprint to give hint to the player that is playing if the number is higher or lower after a wrong guess.

COLLAPSE

Task #2 - Points: 1

Text: 2+ Screenshots of code and demo

Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Show implementation working by running the program
#2	1	Clearly caption the screenshot of what you're showing
#3	1	The code screenshot(s) clearly show the code specific to the feature
#4	1	A comment with the UCID/date is visible near the code change(s)

Task Screenshots:

Gallery Style: Large View

Small Medium Large

```
private void processGuess(int guess) {
    if (guess < 0) {
        return;
    }
    System.out.println("You guessed " + guess);
```

```java
        System.out.println("You guessed " + guess);
        if (guess == number) {
            win();
            pickNewRandom = true;
        } else {
            System.out.println(x:"That's wrong");
            if (guess < number) {
                System.out.println(x:"The amount that comes in mind is greater.");
            } else {
                System.out.println(x:"The amount that comes in mind is lower.");
            }
            strikes++;
            if (strikes >= maxStrikes) {
                lose();
                pickNewRandom = true;
            }
```

Code and the edit that was made.

Checklist Items (1)

#3 The code screenshot(s) clearly show the code specific to the feature

```
Welcome to NumberGuesser4.0
To exit, type the word 'quit'.
Loaded state
Welcome to level 1
I picked a random number between 1-10, let's see if you can guess.
Type a number and press enter
6
You guessed 6
That's wrong
The amount that comes in mind is lower.
Type a number and press enter
2
You guessed 2
That's wrong
The amount that comes in mind is greater.
Uh oh, looks like you need to get some more practice.
The correct number was 3
Welcome to level 1
I picked a random number between 1-10, let's see if you can guess.
Type a number and press enter
```

Demo for the edit that was done in the code.

Checklist Items (1)

#1 Show implementation working by running the program

Implementation 2 (4 pts.)

COLLAPSE

Task #1 - Points: 1

Text: Chosen Option and Details

Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Mention which option you picked
#2	1	Explain the logic of how you solved/implemented the chosen option (concrete details). Explain how the code works, don't just paste code snippets

Response:

I chose option 4 (Display a cold, warm, hot indicator). In 'processGuess' after showing the guess is correct or not. and then we can determine if its cold, warm or hot.

COLLAPSE

Task #2 - Points: 1

Text: 2+ Screenshots of code and demo

Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Show implementation working by running the program
#2	1	Clearly caption the screenshot of what you're showing
#3	1	The code screenshot(s) clearly show the code specific to the feature
#4	1	A comment with the UCID/date is visible near the code change(s)

Task Screenshots:

Gallery Style: Large View

Small Medium Large

```
System.out.println("You guessed " + guess);
if (guess == number) {
    win();
    pickNewRandom = true;
} else {
```

```java
} else {
    int difference = Math.abs(guess - number);
    String indicate;
    if (difference >= 10) {
        indicate = "cold";
    } else if (difference >= 5) {
        indicate = "warm";
    } else {
        indicate = "hot";
    }
    System.out.println("It seems wrong. You're " + indicate + ".");
    strikes++;
    if (strikes >= maxStrikes) {
```

Code and Edit for the code.

Checklist Items (1)

#3 The code screenshot(s) clearly show the code specific to the feature

```
You guessed 7
It seems wrong. You're hot.
Type a number and press enter
3
You guessed 3
It seems wrong. You're hot.
Type a number and press enter
14
You guessed 14
It seems wrong. You're warm.
Type a number and press enter
```

That is the output for the edit of the code.

Checklist Items (1)

#1 Show implementation working by running the program

COLLAPSE Misc (2 pts.)

COLLAPSE

Task #1 - Points: 1

Text: Reflection

Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Example prompts: Learn anything new? Face any challenges? How did you overcome and issues?
#2	1	At least a few logical sentences related to the assignment.

Response:

I learned how to edit on changing the plan of the code as I solved in previous questions.

COLLAPSE

Task #2 - Points: 1

Text: Pull Request URL

Details:
URL should end with /pull/# where the # is the actual pull request number.

URL #1
https://github.com/Fadimeleika/fm362-IT114-006/pull/3

COLLAPSE

Task #3 - Points: 1

Text: Waka Time (or related) Screenshot

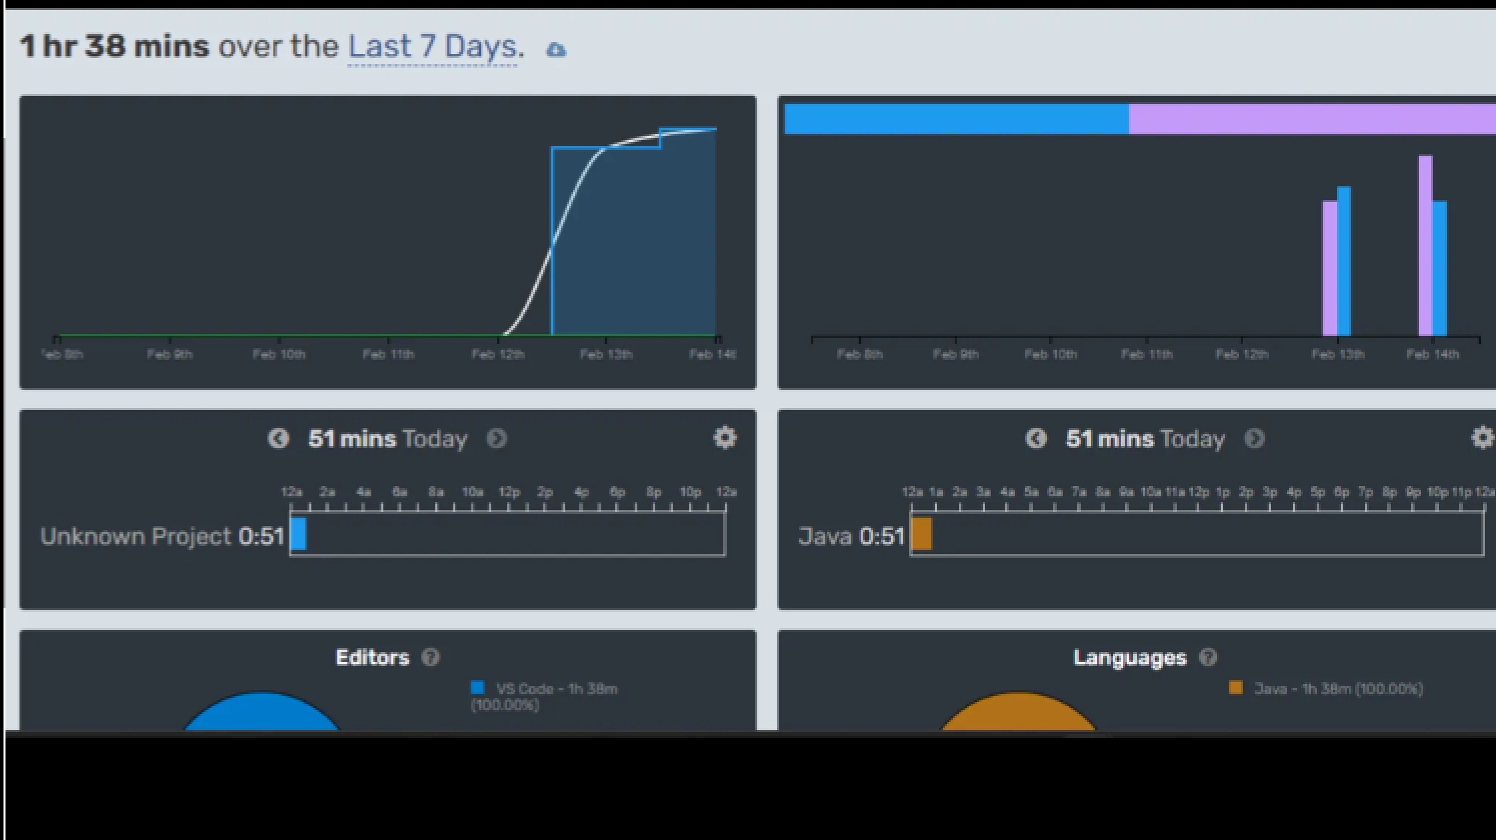
Checklist *The checkboxes are for your own tracking

#	Points	Details
#1	1	Screenshot clearly shows what files/project were being worked on (the duration of time doesn't correlated with the grade for this item)

Task Screenshots:

Gallery Style: Large View

Small Medium Large



The screenshot provides time that was spent.

Checklist Items (1)

#1 Screenshot clearly shows what files/project were being worked on (the duration of time doesn't correlated with the grade for this item)
